Innovative concept, the voice command works! But the actual RTS is dull & bland. 6/10. This game...is terrible. It shouldn't be, though. Unfortunately, there seems like there wasn't enough testing done to fix bugs in the game.

The premise is simple... put troops in predetermined positions to hold off the enemy. As you progress in waves, more complex and powerful troops become available to buy.

From even the first level, you'll run into balance problems. The computer could throw out 4 healers at once. If that's the case, you have zero chance to kill any of them, since they'll just heal each other. You could literally let the game run for 10 minutes and no progress would be made.

Your troops have no option for you to tell them to attack. They just walk around and attack whomever they like, which can also cause problems.

I tried to give it a shot...and I have no clue how I got this game. Unfortunately, this one just isn't worth buying, no matter what price point it's at.. Galaxy Squad is the type of game that I really enjoy.

Combat uses a tactical turn-based squad system reminiscent of the XCOM series. Outside of combat you will be managing your ship and traveling between star nodes where you will encounter events which is reminiscent of FTL.

The game is still in Early Access and thus new features are being added quite frequently and there is the occasional bug. From my experience most bugs are fixed within a few minutes of being reported, depending on the developer's availability and the severity of the bug.

The worst bug I have encountered so far was fixed and updated to Steam within 10 minutes of being reported.. I never liked golf games and expected this game to be lame and dull. I was wrong. It was surprisingly fun with all the challenges and super powered golf balls. If you want to buy a Worms game its most likely not the one you are looking for, but its a pretty fun game so you can give it a shot.. Call of Suzerain doesn't work. You cast it and next turn no hero shows up for hire. I casted the crap out of this spell, just a mana drain spell that does nothing.

Two or three are useful, the rest seem like crap spells.

A really challenging game.. quote; Art ". A fun game, by a great studio

its one of those easy to learn hard to master, being rogue-ish and having randomized characters makes for some interesting outcomes.. WOW, when is the next part out, These movie volumetric video's, need to be supported, the future of movies is astonishing. I can't wait till they produce full blockbuster movies in these formats. The immersion level is something else. Loved it, can't wait for more.. Only played 30 min but it's great! (Even though I backed it on kickstarter for \$4.40 USD, converted to about 6\$ CAD and now its \$4.40 CAD on Steam...but Hey! It was for pizza!)

Great design, good humour, not too easy (maybe I should try the controller) my two hands do not cooperate together lol

'cant wait to buy the naked code.. server is dead, find russian server to play it
